DESIRED

Enhancing Employability of Accounting Graduates in Uganda and Nigeria by Integrating Employability Skills into Accounting Education using a Work-Integrated Learning (WIL) Approach (DESIRED)

Project No. 101228707

Co-funded by the European Union

ACTIVITY REPORT

UNIZIK-ANAN Centre and DESIRED Project 2026 International Hybrid Conference

Overview of some Accountancy Students, Professors and Academic Staff, and the DESIRED Project NAU Team.

Theme:
"Reengineering Contemporary Accounting Thoughts & Practice, Tech Innovations, Industrialisation and Work Integrated Learning in Africa"

Lead Paper Presenter:
Professor Samuel Sejjaaka
Principal, MAT Abacus Business School, Uganda

Sponsored by:
1. *UNIZIK-ANAN Centre*
2. *The* Desired *Project*

Date:
Tuesday *14th July, 2026 (Opening ceremony) –* **Wednesday** *15th July, 2026 (Concurrent session)*

Venue:
UNIZIK Business School, Nnamdi Azikiwe University, Awka, Anambra State, Nigeria

Activity No.	Task Name	Description (including Format and Language)
Activity 4.3	Organize Guest Speakers from Industry to present to Students and Faculty Staff	Topical issues linking Accounting Education and the labour market are presented periodically at HEIs
Work Package 4: Work Package 4: Industry Engagements & Employer Relationships Building

1.0 EVENT OVERVIEW

DAY ONE (TUESDAY, 14TH JULY, 2026)

1.1 Opening Remarks

The 2026 International Hybrid conference which was jointly hosted by the UNIZIK-ANAN Centre for Accountancy Research Studies and the DESIRED Project (EU sponsored project), witnessed the rich intellectual and professional heritage of various Accounting and Non-Accounting Professionals, Professional Accounting bodies such as the Association of National Accountants of Nigeria as well as the Chartered Institute of Forensics and Certified Fraud Investigators of Nigeria (CIFCFIN), distinguished Dons and Leaderships of Higher Educational Institutions across Nigeria and Uganda, Conference Participants and most importantly, immense number of Accounting Students of the Department of Accountancy, Nnamdi Azikiwe University, Awka, Anambra State, Nigeria.

At his opening remark, the Chairman of the occasion, Professor Pius V. C. Okoye, who also doubles as the Director of the UNIZIK Business School, Nnamdi Azikiwe University, Awka, Anambra State, and member of the University Governing Council at Nnamdi Azikiwe University Awka, welcomed the Students, all onsite and virtual Conference Participants, Professors and all Academic Staff present, stating that the conference, given its theme, was timely and most responsive to the needs of Industries and the contemporary Nigeria society. As the State President of the Association of National Accountants of Nigeria (ANAN) Anambra State;, he further noted that the theme of the conference which he deemed intentional, laid clear emphasis on "reengineering" contemporary accounting thoughts and innovations, which are basic requirements for not just becoming a skilled professional Accountant but to also having a fulfilled career in the Accounting profession. The Chairman of the occasion, in view of this, made a passionate call, to the Participants, the Accounting Students present and the Academic Staff, to take good advantage of the conference to upgrade their intellectual and skills capabilities stressing that even Teachers are also Learners, especially at sensitive educational gathering as this.

Prof Pius V. C. Okoye, Chairman of the Occasion

The Director of the UNIZIK-ANAN Centre for Accountancy Research Studies, Professor Emma I. Okoye, who is also the Nigeria Team Lead, the DESIRED Project, warmly welcomed all distinguished Participants from Nigeria and beyond. While appreciating the Participants for their resolute attendance, he confirmed that this reflects their collective commitment to advancing scholarship, strengthening professional practice, and developing practical solutions to the challenges confronting accounting education and practice in the twenty-first century. He further buttressed on the essentialities of the conference theme's touch on Tech-Innovations and Work Integrated Learning (WIL) in accounting education and practice especially in this era of Artificial Intelligence, blockchain, cloud computing, machine learning, data analytics, robotic process automation, and digital financial platforms, stressing that the latter (Work-Integrated Learning) provides an effective bridge between University education and professional practice. He expressed his sincere appreciation to the Lead Paper Presenter, Professor Samuel Sejjaaka (Uganda), the Chairman of the opening ceremony, Professor Pius Vincent C. Okoye (Director, UBS and State President, ANAN)), Deans of Faculties, Directors, Heads of Departments, Professors, Staff, Paper Presenters, the Local Organising Committee (LOC), Students, Media and everyone for their dedication to the success of the conference.

Prof Emma I. Okoye, Director, UNIZIK-ANAN Centre

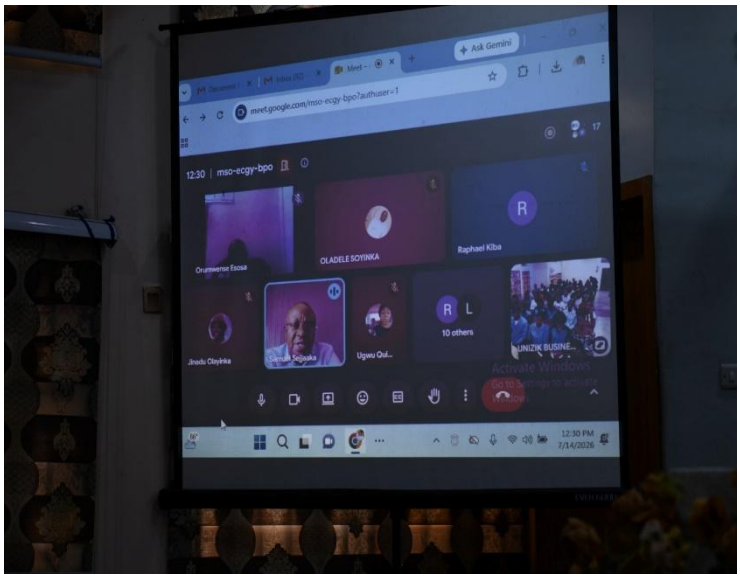

Prof Gloria O. Okafor, DESIRED Project Rep.

The DESIRED Project Representative, Professor Gloria O. Okafor, in her remark, shed concise light on the meaning and goals of the DESIRED Project, its specific objectives, why the DESIRED Project, why the Project is important now, who is involved in the Project, who benefits, what the Project will deliver, the expected outcomes, and the expected impacts, While encouraging the massive number of Accounting Students present to be fully part of the conference which she confirmed was free for them especially as they make finishing preparations for their Internship industrial experience from August 2026, she concluded by stating that it is the Project's commitment to ensure that Accounting Graduates do not just earn a degree but a career as well, by equipping them with the requisite and contemporary skills, experience, and professional identity needed for today's workplace globally through the Work Integrated Learning (WIL).

1.2 The Lead Paper

The Lead Paper Presenter, Professor Samuel Sejjaaka, during his virtual presentation, made foundational reference to the of history accounting. He noted that accounting, since its evolution in the form of double-entry bookkeeping that was first discovered by Luca Pacioli in 1494, has been transformed remarkably in substance, noting that although the instruments used for its

application has shifted and witnessed immense modification through innovations from scrolls to ledgers and then to spreadsheets, the logic and/or principles/thoughts behind its evolution did not change much, except for accounting treatments and standards. The erudite Scholar and Professional stated that the Fourth Industrial Revolution has indeed introduced a wave of disruption that are built on the convergence of digital, physical and biological technologies. Artificial intelligence popularly referred to as AI takes the centre stage in the heart of this contemporary development, thus reshaping the operationalization of accounting system of Enterprises, how entities' operate generally, create value, produce, interpret and communicate financial information.

Prof Sammuel Sejjaaka presenting the Lead Paper Online

This, according to Professor Sejjaaka, is because the bulk of accounting work or responsibilities of corporate organisations are routine in nature, and assuch, are rules and standards-based, and heavy data-oriented, thereby necessitating the intervention role of AI which is most suited for automating and augmenting of accounting functions in an organisation. Indeed, AI provides Professional Accountants with a genuine opportunity that liberates them from the traditional repetitive processes, and helps them focus more energy and time on strategic advisory work, predictive analysis, and the kind of judgement calls that AI cannot guarantee.

The Lead Paper Presenter maintained that Artificial Intelligence (AI) has become a general-purpose technology that does not just change what Professional Accountants do, but also changes how Accountants do it and understand their reshaped role in the whole process. He further pointed out that the areas with the most visible application of AI are automated repetitive work processes such as

i. data entry.
ii. transaction coding.
iii. reconciliation and summarizing.
iv. drafting standard reports.

Laying more clear emphasis on what the term "reengineering" as used in the theme of the conference entails, Professor Sejjaaka revealed that Financial accounting, from time immemorial, has always looked backward by design, especially as Financial Accountants are expected to render periodic financial reports of the firm's performance to Shareholders who are never involved in the day to day running of the business. The minimum disclosure requirements of the International Financial Reporting Standards (IFRS) recognizes that the Statement of financial position (Balance Sheet) readily reports an entity's position after financial events are passed; the Statement of Profit & loss and other Comprehensive Income summarises concluded operations while the Statement of

Cash flow records past movements of finances within an accounting period. Yet, AI does not eliminate this backward-looking function, instead, it adds a forward-looking one to it, using historical data trend of a corporate organisation to identify patterns that inform what is likely to happen next. He further stressed that the emergence of AI in the accounting profession has significantly improved the quality of accounting information systems of organisations, enhanced the operational efficiency and reporting credibility of entity's and provides Professional Accountants with more time for interpretation, strategic input and decision support to organisation's routine compliance work that are automated via Artificial Intelligence (AI). The strength of the knowledge flowing from the Lead Paper caught the curiosity of conference Participants

Participants listening to Prof Sejjaaka with rapt attention

Members of the High table paying keen attention

Professor Sejjaaka also noted that while the adoption of AI in Africa is gradually evolving at a commendable pace, the varying levels of risks associated with such decisions at large, small and medium scale corporate level should not be overlooked and paid less attention. As a result, he proposed a 4 Tier maturity model comprising Tier 1: Automation (Foundation), Tier2: Augmentation (Enhancement), Tier 3: Orchestration (Integration), and Tier 4: Transformation (Reengineering). These also constitute the conceptual framework for AI adoption. He concluded his presentation by saying that "*the question is not whether the profession will be reengineered, but how quickly and how well we will adapt. That depends on the choices being made now by Academics, Advisory firms, Professional bodies, and Standard Setters*".

DAY TWO (WEDNESDAY, 15TH JULY, 2026)

1.3 Concurrent Session

The day two of the 2026 International Hybrid conference featured presentation of research papers drawn from the sub themes of the conference namely contemporary accounting thoughts & practice, Tech Innovations, Industrialization, and Work Integrated Learning approach. A total of Thirty Sex (36) research papers were received for the concurrent session purpose. These were categorized into two mode of presentation namely Thirteen (13) papers for virtual presentations while the remaining Twenty Three (23) were presented Onsite (physically).

The presentations were interactive in nature, and was made before two distinct Panels comprising a total of seven (7) Panelists. These Panelists also read the manuscripts and made professional comments where relevant. Paper Presenters are expected to effect all such corrections before the papers can be featured in the conferences Book of Proceedings.

2.0 CORE FOCUS AREAS COVERED

The conference and the presentations made pointed Participants to the following key areas:

a. ***Technologies improves relevance of accounting thoughts:*** The direction of Accounting principles and concepts remain the same, if not for slight changes through standards setting. The advent of robust technologies do not change them. They only modified how these principles, concepts and standards are implemented.
b. ***Artificial intelligence in Accounting***: Be positive to learning and understanding how Artificial Intelligence and other sophiscated technologies/ innovations are relevant to today's accounting practice and industries. Participants should not be ignorant of them.
c. ***Large Data Management:*** Emphasizes on real time timely management of large data for efficient financial reporting.
d. ***Internship exposure and Pedagogy skills:*** How first-hand real work experience changes Students and Participants existing knowledge, attitude and skills to accounting thoughts and practice.
e. ***Raising environmental-friendly Accountants (green Accountants)***: Building up professional Accountants that understands the value of the organisation they work for and the environment of the communities hosting the organisation's operations.
f. ***Contemporary needs of today's market***: Industries today need skilled professional Accountants, not just certified knowledgeable Accounting graduates.
g. ***Industry-Academic Linkages via Internships***: Industries are not looking for degrees but skills that are relevant to their operations, growth and expansion. Acquisition of robust Tech skills and knowledge distinguishes a graduate at the labour market.
h. ***Work integrated learning (WIL)***: Creates skills-building opportunities that assist accounting Students to be intentional in charting a career path in accounting, taxation, auditing et cetera, for themselves before graduation from the higher educational institution (HEI).
i. ***Investing in Research and development***: Accountants that will make a unique difference in practice must create room always to understanding what happens around them and in various industries from time to time. This is one of the huge benefits of research and development at organizational level.
j. ***Embrace of case studies and learn from real life events***: At the concurrent session stage of the conference, case studies and past daily experiences will be entertained. This is to help Students and Participants learn from mistakes and successes of existing professional Accountants in the industries.

2.1 KEY EXPECTATIONS

Participants and the Students will be evaluating and assessing their competencies and readiness to translate their knowledge-base into practice common to the competitive market in this era of hyper technological explosion. The following are expected:

a. **Becoming efficient in learning and upgrade of existing skills:** We expect Accounting Students to become more focused afterwards; seeking relevant skills upgrade only in contemporary applicable knowledge that count in their choice of career for efficient professional development purposes.
b. **Acting and being seen as a Professional:** Participants and students are expected to take personal responsibility for their career progress as prospective Accountants, and be intentional about that.
c. **Build robust technical skills:** The power of Internship, short local and foreign courses, online training development programmes, workshops, continuing development programmes et cetera, at equipping Accounting Students, Accounting graduates and existing professional Accountants with formidable modern day Tech and innovation related skills must not be ignored.
d. **Growing strong initiative and innovative skills:** Accounting students are expected to begin to grow initiative skills that position them productively at the managerial table of an organisation to make their contributions to its growth and expansion. We expect that this will pave way for applicable innovations that can merge emerging technologies with corporate organisations' operations and business activities.
e. **Improved Familiarity with Technological Accounting roles:** Accounting Students will now learn to understand how Artificial Intelligence carries out relevant accounting roles such as financial recording, financial reporting, auditing, tax assessment and so on, in order to ensure that such professional accounting roles align with the minimum disclosure and auditing requirements of International Financial Reporting Standards (IFRS), International Standards in Auditing (ISA), Auditing guidelines, Interpretations of IFRS (IFRIC), and other relevant business laws and statutes in Nigeria.
f. **Provision of robust Advisory services on post Artificial Intelligence accounting functions:** Role of human Professional Accountants in the corporate environment is indispensable. Rather, Artificial intelligence emergence provides Professional Accountants with ample time space to understudy the enterprises towards providing professional advisory services with far reaching benefits.
g. **Encourage Team work:** Grow with others. No one in this age knows it all. Allow for group brainstorming. The stronger a team, the stronger the innovation.
h. Be growth positive: Your goal as a prospective and existing Accountant should be to remain positive about your daily growth and development in your career and practice. Do not rely on crude ideas of yesterday for professional practice tomorrow. The world is changing rapidly everyday with new innovations and technologies taking over the industries and market every second. Do not be left behind.

3.0 SPECIAL FEATURES & ENGAGEMENT

3.1 Interactive Question and Answer (Q&A)

Prof Onyinye M.Eneh, Head, Department of Accountancy

Coordinating this session, Professor Onyinye M. Eneh, the Head, Department of Accountancy, Nnamdi Azikiwe University, Awka, Anambra State, Nigeria, lightened up the enthusiastic mood of the Accounting students who not only showed renewed interest in the sub themes of the conference, particularly the Internship and Work integrated learning (WIL) aspect, but also opened up on their growing worries, given the position of the Lead Paper presented by Professor Samuel Sejjaaka on the rising influence of Artificial Intelligence in the Accounting profession globally. This interactive relationship between the Onsite and Online Participant, Accounting Students, Academic staff present, and the Lead Paper Presenter was warmly moderated by Professor Eneh.

Notable among the numerous questions asked by the Accounting Students was "*if the growing assumption that the emergence of Artificial Intelligence will further worsen the job displacement of Accountants in the industries, was true?"* Prof Sejjaaka responded, stating that such technological advent is not just in the accounting profession but in every other fields of practice as the world is currently driven by technology. He made it obvious that several functions remain insufficiently explored in the accounting discipline, but the advent of AI appear to be addressing these lapses, noting that this is the more reason every Accounting Student and practicing Accountants must upgrade their skills periodically to remain relevant in the profession by understanding the relevance and varying functions of Artificial intelligence in the accounting profession.

4.0 OUTCOME/RECOMMENDATION

i. Participants were encouraged to upgrade on their existing skills and embrace new technological skills relevant to profession practice as Accountants.
ii. Accountancy Students numbering one hundred and fifty four (154) were exposed to the benefits of possessing robust technological and innovation-based skills in this era of technology-driven market.
iii. Immediate follow up on Accounting Students' level of preparation for the internship experience commencing in August 2026.

5.0 ATTENDANCE & PARTICIPATION

The two day international hybrid conference recorded a total of 249 Participants comprising 154 Accounting Students, 29 Accounting Staff/Lecturers and 66 Onsite/Online conference Papers Presenters in attendance.

5.1 SUMMARY OF CONFERENCE ATTENDANCE

A. Staff

1. Prof Emma I. Okoye, *Director, UNIZIK-ANAN Centre for Accountancy Research Studies, and DESIRED Project, Nigeria Team Lead.*
2. Prof Pius V.C. Okoye, *Chairman of the Occasion.*
3. Prof. Gloria O. Okafor, *DESIRED Project Representative.*
4. Prof. Onyinye Eneh, *HoD, Dept. of Accountancy and Member, DESIRED Project NAU Team*
5. Prof. Patrick A. Egbunike, *Department of Accountancy.*
6. Prof Austin Odum, *Department of Accountancy.*
7. Prof Gideon K. Ezu, *Department of Banking & Finance.*
8. Dr. Ugochukwu J. Nwoye, *Chairman, Local Organising Committee. And Member, DESIRED Project, NAU Team*
9. Dr Ogochukwu Onyeogubalu, *Secretary, Local Organising Committee.*
10. Dr Segun I. Adeniyi, *Member, Local Organising Committee.*
11. Dr Peace C. Umenzekwe, *Member, Local Organising Committee.*
12. Ochuka Chekwube Esther, *Member, Local Organising Committee. And Member, DESIRED Project, NAU Team*
13. Dr Bridget Akwuobi, *Member, Local Organising Committee..*
14. Dr Callista U. Uchegbu, *Member, Local Organising Committee.*
15. Dr Nonye J. Ezenwafor, *Member, Local Organising Committee.*
16. Dr Ogochukwu C. Nduka, *Member, Local Organising Committee.*
17. Dr Chinwe G. Odum, *Department of Accountancy.*
18. Dr Mary-Fidelis Abiahu, *Department of Accountancy.*
19. Dr Chinedu J. Ndubuisi, *Department of Accountancy.*
20. Dr Blessing O. Agbo, *Department of Accountancy.*
21. Dr Sylvanus A. Nma, *Department of Accountancy.*
22. Mrs Chiemezie Janet Onyekwelu, *Academic Staff.*
23. Mrs Sandra O. Onwunali, *Academic Staff.*
24. Mrs Ngozi B. Oraeke, *Academic Staff.*
25. *Godswill Livinus, Academic Staff.*
26. *Mrs Uju Ekpeh, Department of Accountancy.*
27. *Mr Gabriel Nweke, Academic Staff.*
28. *Mrs Juliet C. Onyegiri, Academic Staff.*
29. *Mrs Ogochukwu Emenaka, Department of Accountancy.*

B. Students

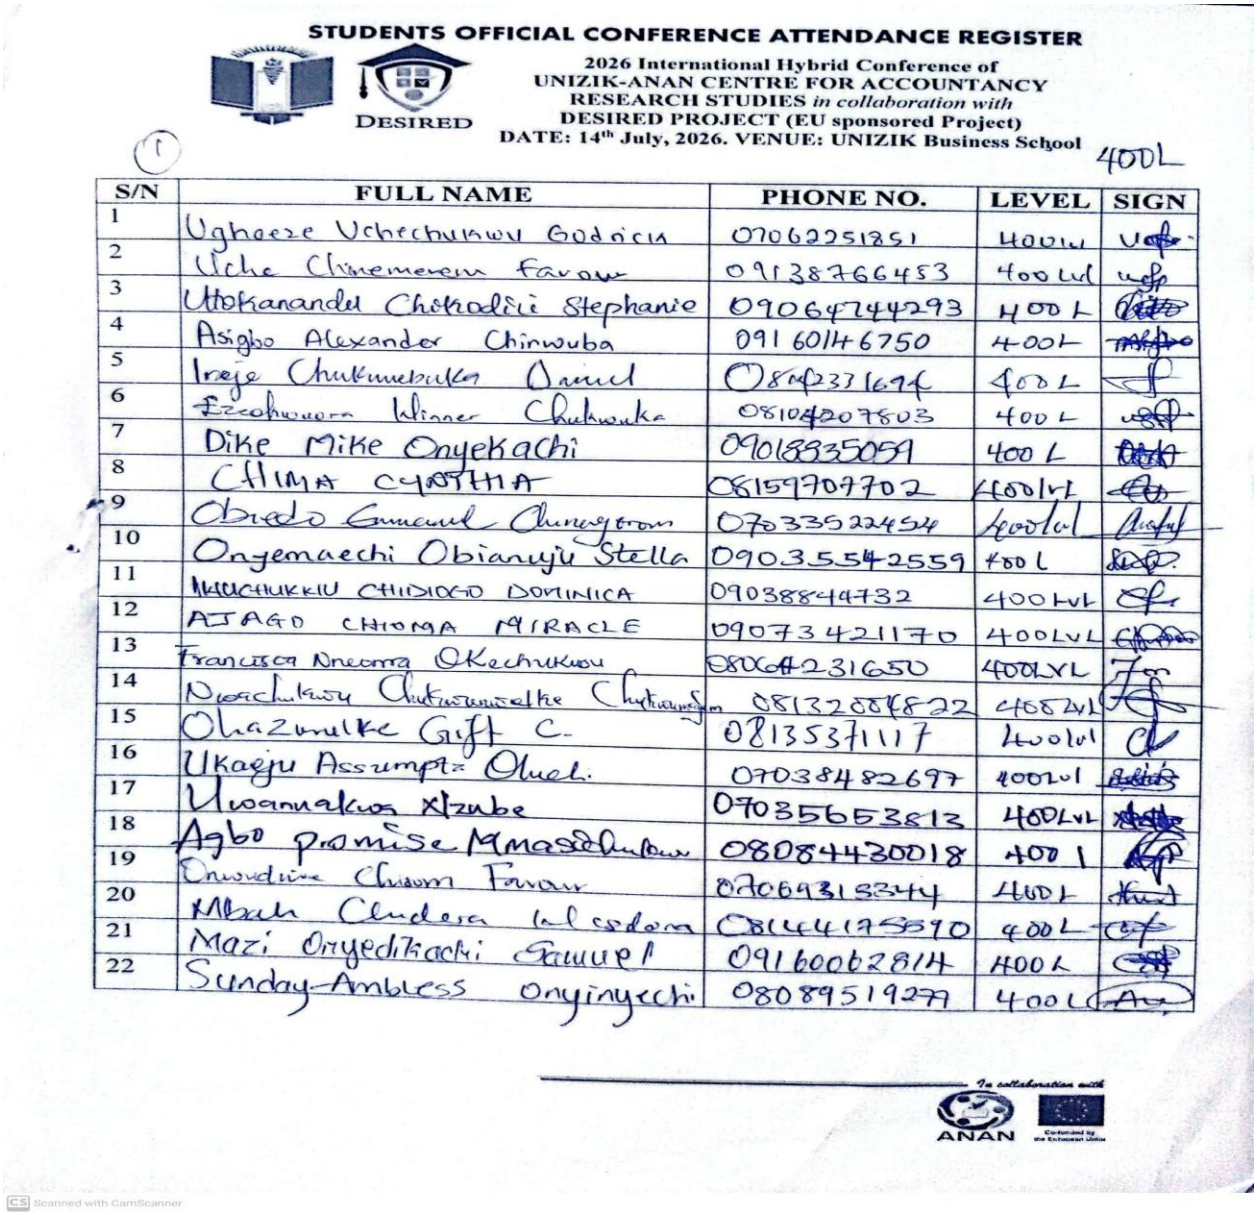

i. 200 level = 27 Students
ii. 300 level = 102 Students
iii. 400 level = 25 Students

Total Accountancy Students in attendance = 154 Students

See signed attendance of Students as attached.

C. Conference Papers Onsite and Online Presenters

66 Participants were registered.
